

TeleEEG Reading Positions

Subspecialty Depth. No Geographic Limits.

Who We Are

TeleSpecialists is a physician-owned digital healthcare practice delivering neurological care nationwide. Since 2014, our board-certified physicians have provided expert EEG interpretations directly into hospital EMRs, supporting neurology programs across more than 400 hospital partnerships and 1.5 million patients served.

Practice Highlights

Scale of Practice

- **400+** hospital partnerships nationwide
- **1.5 million+** patients served since 2014
- The nation's **most established** dedicated neurology employers
- **Full reading coverage** across routine, STAT, long-term, ambulatory, POC and pediatric EEG studies

Clinical Foundation

- Physician-founded, physician-owned, physician-led
- One study at a time, no queue pressure
- Structured orientation with clinical mentors
- Subspecialty depth supported within a national physician network

Reading Practice Model

- Routine EEG reads completed within 12 hours
- STAT reads are prioritized and completed within an hour window
- Continuous and long-term studies reviewed daily
- Case volume structured to protect read quality, not maximize throughput
