

# Shared Services

## Bridging Gaps in Coverage

### Our Service

Address gaps in coverage and elevate your facility's neurology or psychiatry services with our shared coverage model. Our model is designed to ensure seamless coverage while supporting your existing providers. We provide the option of assigned schedules to ease the call burden on your providers as well as redundancy in coverage to support in times of high demand without sacrificing timely response to the bedside.

### HIGHLIGHTS

- Your facility has control over the call schedule and assignment of primary calls to your providers or our team
- Customized model aligns with your program and fits wherever and whenever it's needed
- Experienced telemedicine specialists empower your facility to deliver comprehensive care to patients with neurological or psychiatric conditions
- You maintain primary control, allowing us to seamlessly tailor the program to integrate with your existing healthcare model

### BENEFITS

- Shared services model fills gaps in coverage
- Option of assigned shifts or redundancy in coverage
- Our board-certified physicians are staffed 24/7 in TeleCare
- Customized program gives you primary control
- Diversified telemedicine service offerings

### What You Need to Know
