

TeleNeuroHospitalist Rounding Positions

Full Inpatient Neurology. Without Leaving Home.

Who We Are

Since 2014, TeleSpecialists has grown into a neurologist-owned digital healthcare practice serving more than 400 hospital partners. Our board-certified physicians deliver care across the full spectrum of neurological services: acute stroke consultation, inpatient rounding with dedicated bedside partners, expert EEG interpretation, and outpatient neurology. This practice was founded, owned, and is led by neurologists who understood what meaningful clinical work looks like at scale, and built a model designed to sustain it.

Practice Highlights

Scale of Practice

- **400+** hospital partnerships nationwide
