The Telemedicine Specialists™

# Telemedicine for Transformative Patient Care

TeleSpecialists® is a leading national physician-owned provider of telemedicine solutions for quality-focused hospitals and healthcare systems. We set the standard for rapidly accessible remote neurology and psychiatry services, both emergent and non-emergent.

Our board-certified physicians deliver efficient telemedicine programs that support better patient outcomes to help medical professionals save lives through transformative care.

**BOARD-CERTIFIED  
PHYSICIANS**

**EFFICIENT TELEMEDICINE  
PROGRAMS**

**OUTSTANDING  
PATIENT OUTCOMES**

## Hundreds of specialized physicians

TeleSpecialists is comprised of board-certified, fellowship-trained, fully licensed and credentialed doctors with extensive clinical stroke and inpatient psychiatric experience. Faster than it takes an in-house physician to walk across your hospital, one of our team members can be by a patient's side, facilitating examination, providing care, and escalating concerns to encourage transformative outcomes.

## Lean telemedicine programs

Through a team of respected physicians, TeleSpecialists designs remote clinical service models that meet the objectives of future-focused hospitals and healthcare systems. Our proven process and proprietary TeleCare by TeleSpecialists™ software ensures streamlined workflows, rapid response times, strong clinical metrics, and robust data governance that help your staff alleviate care burdens, enhance productivity, and optimize the continuity of care.

## Life-saving remote care services

Replacing in-person care with TeleSpecialists physicians allows hospitals and healthcare systems to effectively meet the demands of large patient populations and offer access to specialized neurological and psychiatric solutions. Simplify accreditation, support better patient outcomes, and free up staff for other critical activities by implementing our remote care program.

# Suite of Services

## TELENEUROLOGY

Adopt a reliable approach to organization-wide coverage for conditions related to the nervous system with telemedicine for neurological consultations. On screen in minutes, our experienced and expertly trained physicians are available to respond quickly to emergent neurological needs, perform non-urgent hospital rounding visits and follow-up exams, or step in to help analyze and interpret EEGs.

- TeleStroke
- TeleNeuroHospitalist

## TELEPSYCHIATRY

Become better equipped to provide inpatient behavioral health services with telemedicine for adult psychiatric consultations. On-site staff can rely on TeleSpecialists to complete scheduled bedside rounds, manage emergency cases, order necessary testing, and close the loop on patient outcomes with detailed notes entered directly into your native EMR or CPOE system.
