

Pediatric EEG

Fellowship-trained pediatric epileptologists providing reads directly to your EMR.

The Gap Your Hospital Can Close

Without on-demand subspecialty access, transfer becomes the default, separating families, losing revenue, and delaying treatment. TeleEEG closes that gap.

Pediatric Services

Pediatric and Neonatal EEG

Fellowship-trained epileptologists provide age-appropriate interpretation across all developmental stages, including premature neonates.

STAT EEG Interpretation

Urgent studies route immediately through a dedicated Rapid Response pathway. No scheduling. No escalation required.

Long-Term EEG Monitoring

Daily interval reviews during active recording with comprehensive final interpretation by epileptologists trained in continuous pediatric studies.

Point-of-Care EEG

Specialist interpretation integrated with bedside AI-enabled monitoring devices.

The TeleSpecialists Vantage

-  **Continuity of Care**
Pediatric EEG coverage across inpatient and outpatient settings
-  **Subspecialty Precision**
Fellowship-trained epileptologists on every age-appropriate study
-  **Expanded Access**
Reduce pediatric transfers with immediate subspecialty availability
-  **Cost-Effective**
Expand pediatric EEG capacity without adding staff
-  **Proven to Scale**
1.5M+ consults | 400+ hospitals | Fellowship-trained physicians

Why Partner Hospitals Choose Pediatric EEG

- Retain pediatric patients and associated revenue while reducing transfers
- Timely reads eliminate diagnostic bottlenecks and accelerate discharge planning
- No subspecialist recruitment, coverage is available immediately
- Reads populate directly into your native EMR
- Predictable professional fees with no capital investment required

“We do not interpret EEGs and close the chart. We interpret EEGs and make ourselves available to the team managing the patient.”

**-William Dotson, MD,
EEG Service Line Director,
TeleSpecialists**
