

TELESTROKE

Every second counts during a stroke or neurological emergency. A TeleSpecialists TeleNeurologist can be your patients' lifeline by connecting directly to them in three minutes, on average. Our unique and extremely efficient system dramatically improves patient outcomes and, ultimately, saves lives!

TeleSpecialists TeleStroke service includes all emergent neurology consults, including acute encephalopathy, Bell's Palsy, syncope and stroke. It is an effective and affordable solution for neurology coverage in your facility.

TeleStroke Program Benefits

- 24/7/365 access to a board certified neurologist
- Improve program Door-to-Needle times
- Increase patient satisfaction ratings
- Improve patient retention
- Increase regional market share and program reputation

Value & Efficiency

- Improve your stroke program with our collaborative PI strategies, utilizing Lean principles within your organizations existing infrastructure
- TeleSpecialists physicians document and write orders directly in your native EMR
- TeleSpecialists provides ongoing process improvement to develop on-site rapid triage and second-level assessment protocols assisting in early stroke team notification
- Our e-Alert system and highly efficient team in the TeleSpecialists Rapid Response Call Center ensures prompt on-screen response
- With minimum technology specifications required, most hospitals can utilize their existing telemedicine cart and video platform

Quality Review

TeleSpecialists is committed to the delivery of high-quality patient care. Our quality management department is spearheaded by a nursing team with over 50 years of hospital-based quality oversight. Every partner facility is assigned a dedicated licensed RN Quality Program Specialist (QPS). These RNs oversee all quality elements associated with your program.

TeleSpecialists is accredited by The Joint Commission and maintains certification through Bureau Veritas for ISO 9001:2015.
