

OUR SERVICES

TeleStroke & Emergent TeleNeurology

Board-certified neurologists available to you 24/7/365 via telemedicine from an outside location to assess and treat acute stroke alerts and other emergent neurology consults, including syncope, acute encephalopathy, Bell's palsy, and acute altered mental status.

TeleNeuroHospitalist

Inpatient program providing routine consultations and follow-up evaluations on patients requiring neurologic work-up. This program allows for timely patient follow-up, reduced length of stay and patient retention for those with neurologic illnesses.

TelePsychiatry

Emergent and routine TelePsychiatry consultations to aid in the evaluation, stabilization and disposition of a variety of mental health emergencies. Our team of board-certified psychiatrists provide detailed and comprehensive psychiatric evaluations, assessments, treatment plans and follow-up recommendations.

EEG Services

Remote EEG interpretation services are available via telemedicine utilizing a panel of experienced neurologists to read routine and STAT EEGs.

All the docs at TeleSpecialists go above and beyond to see good outcomes for the patients and that speaks VOLUMES for this community.

WHEN YOU
NEED IT

ABOUT US

TeleSpecialists provides a high-quality, comprehensive, and cost-effective telemedicine solution that is personalized to fit your facility's needs. With a nationwide reach and a team of over 90 board-certified physicians on staff, we are the leaders in patient-centric telemedicine.

Since our inception in 2013, TeleSpecialists has consulted on over 500,000 cases and is proud of being a physician-owned and led organization. A robust Quality team reviews every case we consult on, and our median physician-to-on-screen time is just 3 minutes.

When we partner together, magic happens.

We provide your hospital:

- Seamless integration
- Fastest bedside response time in the industry
- Cost-effective, Process Improvement program
- Delegated Credentialing services
- Providing over 15,000 consults per month
- A 97% patient satisfaction rating

If your team wants to provide the most efficient service possible to your patients, learn more about the TeleSpecialists Advantage.

Rapid physician access to guide the management of an acute stroke means our patients survive the stroke with less disability for the rest of their lives.

Nima Mowzoon, MD, MBA, – CEO & Founder, TeleSpecialists
